COLLAGEN LIGHT THERAPY FOR SKIN, TESTIMONIALS & OPINIONS

The Light Sources group does not sell directly to the end user market. We sell our products through distribution and in an OEM marketplace. We pride ourselves at being innovative, and we find it imperative to hear the reviews of the end users, to judge our success. The critiques which have come back on our collagen lamps have been absolutely positive – the following is a sampling of collagen red light therapy success stories:

Victoria V., Michigan, United States

"I have used the red lamps 11 times in the past 3 weeks. My facial skin is tighter, brighter and it feels very smooth. The rest of my skin is holding moisture much better and doesn't seem as dry and flaky. I have a client who I hadn't seen in over a year. She wanted to know what I was doing as I looked much younger than the last time she saw me. This impressed me so much that I will continue to treat my skin with collagen red light therapy at least 3 times per week."

Richard H., Ohio, United States

"I see spider veins disappearing after 1 month. Red light amplifies even further the overall sense that it is helping slow down the aging process."

Melanie M., Connecticut, United States

"I am 37 years old and started my red light therapy about 6 months ago. Since the age of 30, I had been discovering a new fine line or other age-related skin imperfection seemingly daily... Early into my red light treatment, I stopped noticing new flaws. Instead – almost daily – I find myself shocking someone with my age (the oldest assumption is usually late 20's)."

Brenda B., Ohio, United States

"My skin is softer and has definitely firmed. My entire body is soft & hydrated, fine lines under my eyes have disappeared. My adult hormonal acne has cleared. My Aesthetician said my skin glows! My stomach had 3 scars that were thick and raised, now they are thin and disappearing. I am extremely happy with my results."

Agnes K., Budapest, Hungary

"After about five sessions with the collagen bed I felt that my skin became much more soft, smooth and elastic. I completed all my sessions and will now start with the maintenance phases. I never felt any pain after a session and my skin was never red or swollen, which was great as I could get back to work right away. Even my relatives and friends recognized the change in my skin and I already recommended everyone to try collagen beds as well."

Laura B., Ohio, United States

"Red light has totally changed my skin, I can feel, my face and neck tightening. I am 49 years old and that is a big accomplishment. My age spots on my hand have totally disappeared. But the most surprising is the extreme dryness on my legs has disappeared. I have experienced this for years with no relief."

Sherry P. (RN), Ohio, United States

"I am very pleased with my results from the red light therapy. My skin does appear younger. Besides my face, I am very happy with my neck & chest. My skin is very soft. I see a difference in the cellulite on my legs & buttocks. Red light does just what it claims to do in the brochure."
